**INVESTMENT OBJECTIVE AND STRATEGY**

The Fund is a peso denominated money market Unit Investment Trust Fund that aims to provide its participants with enhanced yields for the short-term liquidity needs by investing in a diversified portfolio of short-term, highly liquid fixed-income securities, term deposits and other money market instruments. The Fund aims to surpass the prevailing savings account rate (gross of fees). The Internal Peso Savings Rate was used as a benchmark which aligns to the funds low risk profile. It provides a clear reference point for investors comparing returns to their traditional deposit products.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The CTBC Money Market Fund is suitable only for investors who:

- Have a conservative, moderate, or aggressive risk appetite.
- Can accept slightly higher returns than traditional deposits so long as the funds are safe.
- Have a short term investment horizon, ranging from one to three years.
- Are looking for a pooled fund invested in a mix of short term time deposits, treasury bills and bonds, and some corporate bonds. This is a conservative risk product.

**KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

**Market Risk** - This is the possibility for an investor to experience losses due to changes in the market prices of securities.

**Interest Rate Risk** - This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

**Default Risk** - This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds.

The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. The Fund may avail financial derivative instruments solely for the purpose of hedging risk exposures.

❖ THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)
❖ RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY
❖ WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT
❖ THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, FRAUD, BAD FAITH OR GROSS NEGLIGENCE

## OTHER DISCLOSURE

### RELATED PARTY TRANSACTIONS

The Fund has a P1,470,793.19 casa balance and TD with CTBC Bank. All related party transactions are conducted on an arm's length basis.

### OUTLOOK AND STRATEGY

The CTBC Money Market Fund continues to favor short-duration government bonds and time deposits.

The Bangko Sentral ng Pilipinas resumed its monetary easing cycle in 2Q25, reducing the Target Reverse Repurchase Rate by 50bps to 5.25%, amid easing inflation and slower-than-expected economic growth outlook. Inflation stayed within the central bank's target range of 2-4%, supported by lower domestic food prices, particularly rice, and lower global oil prices. The 1Q25 GDP grew by 5.4% y/y, a bit faster than the 5.3% growth in 4Q24 but weaker than the 5.9% expansion recorded in 1Q24, amid tariff-induced global headwinds. Economic growth is projected to settle within the government's 5.5-6.5% reduced target range for the year, from a previous goal of 6-8%. The interest rates on the overnight deposit and lending facilities were correspondingly adjusted to 4.75% and 5.75%, respectively. Domestic liquidity (M3) continued to expand, reflecting healthy financial system growth.

These provisions create a supportive backdrop for Treasury bills, which remains attractive due to their low risk and competitive yields. Investor demand for short-term placements remains strong, with interbank rates and 1-month tenors trading steadily around 4.40%, indicating stable market conditions.

## **INVESTMENT POLICY/PROSPECTIVE INVESTMENT**

Pursuant to the foregoing objectives, the Fund may be invested and reinvested in the following subject to applicable limits:

- (1) Securities issued by or guaranteed by the Philippine government, or the Bangko Sentral ng Pilipinas;
- (2) Marketable fixed income securities issued or guaranteed by the corporations and traded in an organized exchange;
- (3) Securities issued or guaranteed by any government of a foreign country or any political subdivision of a foreign country
- (4) Loans traded in an organized exchange;
- (5) Savings/checking accounts and/or time deposits in any bank or financial institution, including CTBC Bank (Phils.) provided that the principle of best execution shall be observed at all times and no bookings shall be made with related counterparties without considering at least two (2) competitive quotes from other sources.
- (6) Such other tradable investment outlets/categories as the BSP may allow.

The Fund may avail of financial derivative instruments from time to time solely for the purpose of hedging risk exposures of the existing investments of the Fund in accordance with the Bank's risk management and hedging policy duly approved by the Trust Committee. The Fund will have a minimum exposure of 95% in money market instruments. The remaining funds will be invested in other financial instruments as indicated above.
